

Representação de sinais

Camada física

Professor: Marcelo A. Marotta

Departamento de Ciência da Computação
Universidade de Brasília

Sistema de comunicação segundo C.E. Shannon e W. Weaver (1948)

Sistema de comunicação segundo C.E. Shannon e W. Weaver (1948)

Mas, como converter bits em sinais elétricos?

Sistema de comunicação segundo C.E. Shannon e W. Weaver (1948)

Sistema de comunicação segundo C.E. Shannon e W. Weaver (1948)

**Mas, precisamos caracterizar o sinal elétrico
ante de processá-lo**

Sinal elétrico

Propriedades importantes:

$$E = \int_{t_1}^{t_2} |X(t)|^2 dt$$

$$P = \frac{1}{t_2 - t_1} \int_{t_1}^{t_2} |X(t)|^2 dt$$

Distância(mm)
